(54) Title: METHOD, SYSTEM AND SOFTWARE FOR FAST ARCHIVING FROM HDD TO OPTICAL DISK DRIVE

(57) Abstract: A HDD records content that is archived on an optical disk. To facilitate the archiving, the recording on the HDD takes into account the format wherein the content is going to be stored on the optical disk. At the HDD recording stage, proper multiplexing of the audio and video segments of the content takes place together with the insertion of empty NavPack segments that at the HDD stage are being used as a Recovery segment to transport metadata. The metadata is removed prior to archiving. This configuration supports fast archiving and maintains the quality of the content.
